Learning Outcomes

1. Technical, Conceptual, Problem-Solving

Students will be competent in and be able to apply discipline-specific knowledge and skills in the field of accounting. This learning outcome includes the development of critical thinking and problem-solving skills, as well as an understanding of the strategic role of accounting in business organizations and society.

2. Professional Development

Students will be able to communicate clearly and strategically, after considering the relevant audience, situation, and purpose of the communication. Students will demonstrate the ability to work productively with others to accomplish established goals.

3. Research/Life-Long Learning

Students will be able to use relevant research databases and academic/professional literature to gain new knowledge and analyze business situations.

4. Ethical Principles and Professional Standards

Students will be able to apply ethical principles and professional standards in analyzing situations and making informed decisions.

5. Globalization and Diversity

Students will be able to demonstrate an international perspective and appreciation for diversity and cultural differences, along with their significance in global business.
