

**The Master of Science in Global Supply Chain Management** is a joint program offered by the Marshall School of Business in collaboration with the Viterbi School of Engineering, two top-ranked professional schools at the University of Southern California. Combining a world-class academic foundation in Supply Chain Management with real-world applications in the form of live projects for leading companies as well as international and domestic site visits, USC's Global Supply Chain Management program uniquely prepares students for an increasingly global, complex, and ever-evolving world.

### DIGITAL TRANSFORMATION

Through classes and workshops, MS GSCM students learn to implement emerging technologies in supply chain such as Artificial Intelligence, Machine Learning, and Blockchain.

### CENTER

Through the USC Marshall Center for Global Supply Chain Management, MS GSCM students benefit from unparalleled access to a global network of industry professionals, the Annual Global Supply Chain Excellence Summit, Industry Network Connect career fairs, international seminars and roundtables, and applied research projects.

### CURRICULUM

30 total units over 18 months (4 semesters: Fall, Spring, Summer, Fall). On-campus: 19.5 core, 10.5 elective. Online: 22.5 core, 7.5 electives. [marshall.usc.edu/msgscm/curriculum](http://marshall.usc.edu/msgscm/curriculum)

### STEM-CERTIFIED

International MS GSCM students are eligible for up to 36 months of full work authorization in the U.S. upon graduation.

### LEAN SIX SIGMA

The Lean Six Sigma approach helps supply chain professionals improve business performance by reducing waste and increasing efficiency. All MS GSCM students graduate with their Lean Six Sigma Green Belt.
