

Federal Statistical Research Data Center

University of Southern California

About

Federal Statistical Research Data Centers (FSRDCs) are secure facilities where qualified researchers can access restricted use microdata for their own research. They exist as a partnership between local institutions, the US Census Bureau, and various federal agencies. Among these are the National Center for Health Statistics, the Bureau of Labor Statistics, the Bureau of Economic Analysis, the Agency for Healthcare Research and Quality, the Census Bureau, and more.
